Shed - The proposed change is the addition of a commercially bought shed located on a concrete slab foundation. The slab would be 12' W X 10' D with the 12' length parallel to the back wall of the pre-existing dwelling. It would be located 24" off the dwelling wall, adjacent to but not touching. The shed would be a Tuff Shed TR-800, 12' W X 10' D X 10' 2" H overall dim. The shed is construction of treated wood with wood siding on the outside. The roof would be at a 4/12 pitch and have black standard shingles. I have attached the Specifications as a separate document. The paint color would be Delicate White for all walls and Brick Dust for the door. All the trim would be Delicate White. The door style is a double door, 8' W X 6' 7" H and would be centered on the 12' W wall facing the yard. The shed would have 2 2' X 2' windows; 1 centered on each 10' W wall and ~4' from the bottom of the shed.
